SUBJECT INDEX

A

ACTH and cortisone in thrombocytopenic states, responses to, 810
treatment of calcinosis universalis, 937
comparative assay of, in man, 942
cortisone, and aspirin, comparative effects of, on acute course of rheumatic fever, 812
derived from hogs, sheep, and cattle, clinical and metabolic effects of, a comparative study, 1
Actinomyces bovis, pathogenicity of, the hamster as a vehicle for demonstration of, 914
Addisonian pernicious anemia, liver function in untreated, 718
Addison's disease, epinephrine eosinopenia in surgically induced, 169
replacement therapy in, metabolic effects of, 787
Adrenal cortex, function of, in ascorbic acid deficiency and scurvy in the monkey, 657
Adrenalectomy, bilateral, effect of, on palliation in metastatic carcinoma, 955
Adrenaline, supersensitivity of blood vessels of human skeletal muscle to, following sympathectomy, 794
Agglutination tests, false-positive heterophile, cold agglutination of sheep erythrocytes as a factor in, 964
Albumin, iodinated (I^{131}) human serum, disappearance of, from circulating blood, continuous recording determination of, 928
radioactive iodine-tagged, endothelial permeability to, injected intravenously or intraperitoneally in man, studies on, 941
Alkalosis, experimental metabolic, cerebrospinal fluid pressure, pH and respiration during, 938
Alkyl phosphates, therapeutic effects of, in myasthenia gravis, comparison of, 805
Allergy, symptoms of, alternation of the, and those of alcoholism and certain mental disturbances, 932
Alveolar ventilation during thoracic surgery, 947
Alveolar-capillary membrane in mitral stenosis, oxygen diffusion capacity of, 782
Amebiasis, organism *t* antigen in routine complement fixation test for, study of, 78
Amniotic fluid embolism, clotting defect in, nature of, 932
Anemia, acquired hemolytic, and viremia, 924
Addisonian pernicious, liver function in untreated, 718
pernicious, low erythrocyte counts in, role of maturation arrest in, 790
urorennin excretion in, 926
postirradiation, hemolytic component of, as studied with a modified Ashby technique in the rabbit, 962
refractory macrocytic, with defect in vitamin B_{12} binding and with response to normal plasma, 811
sickle-cell, diagnosis of, anti-sickle-cell anemia rabbit serum in, 940
Anesthesia, high spinal, hemodynamic changes in human beings following induction of, studies of, 819
Anion-cation exchange resin, use of an, and a liberal diet in decompensated hepatic cirrhosis, 777
Antiamebic substance, a new, observations on, 949
Antibiotics, concentration of, in brain, 960
Antibody production and tuberculin sensitivity in rheumatic fever, 930
titer of serum pools as index of types of influenza virus present in a metropolitan area, 785
Anticoagulant, phenylindandione, a new oral, 792
Antigen, a complete somatic, common to Salmonella adelaide, Escherichia coligomez, and Escherichia coli O111: B4, 252
cardiolipin, in Kline test for syphilis. IV. Effect of rate of rotation of antigen-serum mixture, 146
organism *t*, study of, in routine complement fixation test for amebiasis, 78
Antiheparin effect of Polybrene, 927
Antimicrobial defenses, impairment of, following total body irradiation of mice, 682
Antipressor, 1-hydrazinophthalazine as the sole, in treatment of hypertensive disease, evaluation of, 954
Anti-tuberculous therapy, effect of, on serum mucoproteins and gamma globulin, 937
Aorta, coarctation of, blood flow and oxygen consumption of brain in, 789
Arteriophonography, a new measure of cardiovascular function, 933

Articular cartilages of poliomyelitis patients, histochemical characterization of, 284
Artificial kidney, use of. III. Current procedures in clinical hemodialysis, 436
Ascorbic acid deficiency and scurvy in the monkey, function of adrenal cortex in, 657
relation of, to metabolism of folic acid compounds, 924
requirements in "damage," and its relationship to adrenocortical activity, 817
Aspirin, ACTH, and cortisone, comparative effects of, in acute course of rheumatic fever, 812
Aureomycin and chloramphenicol, bacterial sensitivity to, changes in, in course of last three years, 48
and penicillin, effectiveness of, in pneumococcic infection in mice, 820
bacterial sensitivity to, disc method for determining inaccuracies in, discovered by comparison with the tube-dilution method, 149
chloramphenicol, and terramycin in mumps, therapeutic trial of, 951

B

Bacteremia and death, occurrence of, in cortisone-treated mice, 82
Bacteria, fecal, conversion of N^{15}-labeled mesobilirubinogen to stercobilinogen by, 921
gram-negative, syndrome of vascular collapse due to, management of, with l-norepinephrine and antibiotics, 961
Bacterial endocarditis, subacute, cold precipitable serum globulins in, 489
resistance to streptomycin, use of citrated human plasma for studying, 784
sensitivity to aureomycin and chloramphenicol, changes in, in course of past three years, 48
disc method for determining, inaccuracies in, discovered by comparison with the tube-dilution method, 149
Ballistocardiograms, pre- and postoperative torsion of, in surgically amenable cardiovascular diseases, 933
Ballistocardiographs record as recorded by the portable electromagnetic type machine, physical characteristics of, 953
Banthine in the colon, clinical and roentgenologic evaluation of, 950
Benemid, effects of, on free and total sulfonamide plasma levels, 730
metabolic and renal effects of, 798
severe febrile reaction to, occurring in patient with chronic gout, 820
Beta glucuronidase content of human leukocytes in health and disease, 825
Beta-hemolytic streptococci, comparative effectiveness of direct blood agar and modified Pike's broth for demonstrating, of different serological groups, 297
Biliary cirrhosis with cutaneous xanthomatosis due to sarcoidosis; treatment with low cholesterol diet, ACTH, and cortisone, 799
Biological fluids, freezing point of small quantities of, method for determination of, 907
materials, determination of fluoride in, 601
Biopsy, needle, in chemical estimation of liver lipids in man, value of, 780
Blood and urine, dextran in, quantitative determination of, a simple accurate, and rapid method for, 901
carbon monoxide in, determination of, a new spectrophotometric method for, 634
cell counts, changes in white, after administration of cortisone acetate to healthy ambulatory individuals, 841
clearance and tissue distribution of radioactive gold colloids, effect of particle size on, 255
clotting mechanism, effect of certain metabolic processes upon, 111
coagulation of, lack of influence of penicillin on, 956
of whole, photoelectric study of, method for, 766
system, pathogenesis of the plasma transfusion reaction with especial reference to, 374
flow and oxygen consumption of brain in coarctation of aorta, 789
media for the cultivation of Mycobacterium tuberculosis. IV. Effect of adding penicillin, 628
oxyhemoglobin saturation and oxygen content of, spectrophotometric determination of, 431
plasma carbon dioxide, determination of, use of volumetric respirometer in, 156
lipase in human, 860
pepsinogen. I. The source, properties, and assay of the proteolytic activity of plasma at acid reactions, 17
II. The activity of the plasma from "normal" subjects, patients with duodenal ulcer, and patients with pernicious anemia, 188
platelet, mammalian, pathologic physiology of, studies concerning the, utilizing P^{32}-tagged rabbit platelets, 925
pressure, operative and postoperative control of, in pheochromocytoma, 810
serum, modified human globin in, determination of, 206

vessels of human skeletal muscle, supersensitivity of, to adrenaline following sympathectomy, 794
volumes, normal, effects of dextran in subjects with, and in subjects after bleeding, 807
Body fluids, chronic hyperosmolarity of, 796
measure of polyvinylpyrrolidone concentrations in, by means of a turbidity-producing reaction with phenol, 616
of low density, micromethod for determination of density of, 141
irradiation, total, of mice, impairment of antimicrobial defenses following, 682
Bone marrow, ectopic, protective effect of shielded, against total body x-radiation, 355
idiopathic thrombocytopenic purpura, 503
studies in infectious disease, 920

Brucellosis, screening suspected cases of human, correlation of a rapid slide-agglutination test with a tube-agglutination test in, 593

C

Calcinosis universalis, ACTH and cortisone treatment of, 937
Candida albicans, chlamydospore production by, influence of different types of corn meal agar upon, 316
Carbon monoxide in blood, determination of, a new spectrophotometric method for, 634
Carcinoma, metastatic, palliation in, effect of bilateral adrenalectomy on, 955
Cardiac activity, abnormalities of, studied by capacitance method, 961
catheterization, use of whole blood oximeter during, 445
muscle, increase in oxygen consumption of human, incubated with lanatoside C, 867
patients, biopsied muscle from, assay of creatine in, 952
Cardiolipin antigen in Kline test for syphilis. IV. Effect of rate of rotation of antigen-serum mixture, 146
Cardiopulmonary studies in patients with mitral stenosis. I. Cardiovascular dynamics, 390
Cardiovascular dynamics, acute, of fistula between pulmonary artery and left auricle, 136
function, arteriophonography, a new measure of, 933
Carotid pressure studies in relation to management of intracranial aneurysms, 783
Castaneda slide-agglutination test, correlation of a rapid, with a tube-agglutination test in screening suspected cases of human brucellosis, 593
Catalase metabolism, disturbance of, in experimental porphyria, 939
Cellular and extracellular factors in congestive heart failure, 814
Central Society for Clinical Research, proceedings of the 25th annual meeting, Nov. 7 and 8, 1952, 776, 919
Cerebrospinal fluid, diffusion of nitrous oxide into, differential rates of, 851
pressure, pH and respiration during experimental metabolic alkalosis, 938
Chlamydospore production by Candida albicans, influence of different types of corn meal agar upon, 316
Chloramphenicol and aureomycin, bacterial sensitivity to, changes in, in course of past three years, 48
Cholesterol, free, ester, and total, determination of, without saponification, 303
serial serum, in children with diabetes mellitus of recent onset, 793
serum, esterification of. I. Serial determinations in health, 321
II. Influence of phosphatide and other factors, 324
III. In hypercholesterolemic rabbits, 334
Cholic acid and desoxycholic acid, simultaneous quantitative determination of, method for. I. Application to bile, 755
II. Application to blood, 762
Chorionic gonadotrophin, increase in biological activity of, when mixed with plasma, 923
Circulating thyroid hormone, study of nature of, in euthyroid and hyperthyroid subjects by use of paper electrophoresis, 791
Circulation, kidney, effects of hexamethonium (C-6) and 1-hydrazinophthalazine (HP) on, 818
Circulatory changes in acute myocardial infarction, 802
Clotting defect, nature of, in amniotic fluid embolism, 932
mechanism, effect of certain metabolic processes upon, 111
Coagulation of whole blood, photoelectric study of, method for, 766
Coarctation of aorta, blood flow and oxygen consumption of brain in, 789
Cold precipitable serum globulins in subacute bacterial endocarditis, 489

Colon, Banthine in the, clinical and roentgenologic evaluation of, 950
"Compensated" cirrhosis of liver, excretion of water and sodium in, abnormalities in, 523
Complement fixation reaction in histoplasmosis, study of, 90
Compound F, intra-articular, changes in joint temperature and potential induced by, 948
metabolism of, studies on, 797
Congenital subaortic stenosis and aortic stenosis, pulse curves in diagnosis of, 785
Congestive heart failure, cellular and extracellular factors in, 814
Corn meal agar, influence of different types of, upon chlamydospore production by Candida albicans, 316
Coronary atherosclerosis, degree of, in bilaterally oophorectomized women, 963
Cortisone acetate, changes in white blood cell counts after administration of, to healthy ambulatory individuals, 841
effects of, during low-sodium regimen of Laennec's cirrhosis, 744
ACTH, and aspirin, comparative effects of, on acute course of rheumatic fever, 812
adverse effect of, on marrow regeneration following irradiation, 174
and ACTH in thrombocytopenic states, responses to, 810
treatment of calcinosis universalis, 937
DOCA, and testosterone in Addison's disease, metabolic effects of, 787
effects of, on removal of India ink by the reticuloendothelial system, 801
incubation of, with surviving liver slices, steroid compounds resulting from, 796
rheumatoid arthritis treated with, electrophoretic studies on, 10
Cortisone-treated mice, occurrence of bacteremia and death in, 82
Counting erythrocytes, a diluting fluid for, which simultaneously stains the cells and makes them lie flat within a single focal plane, 479
Craniospinal transcapillary seepage, 936
Creatine, assay of, in biopsied muscle from cardiac patients, 952
Cultures of Salmonella isolated in city of Mexico, classification and distribution of 1,075, 73
Cysteine, effect of, on immune response and mortality rate of rabbits exposed to ionizing radiation, 789
Cystodiagnostic methods in gastrointestinal malignancy, new, 935

D

"Damage," human ascorbic acid requirements in, and its relationship to adrenocortical activity, 817
Dermatitis, seborrheic; a local metabolic defect involving pyridoxine, 121
Desoxyephedrine, mechanism of action of, on vascular bed in the limb of the dog, 131
Dextran and oxypolygelatin as plasma volume expanders; renal excretion and effects on renal function, 880
effects of, in subjects with normal blood volumes and in subjects after bleeding, 807
in blood and urine, quantitative determination of, a simple, accurate, and rapid method for, 901
Dialysis of small quantities of fluids, apparatus for increasing the speed of, 313
Dialyzer construction, effects of, on transfer rates, 271
Diethylstilbestrol, in vitro fungistatic activity of, 782
Digestive tract, influence of some emulsifying agents on, 948
Digitoxin (Digitaline Nativelle), intramuscular injection of, in a new solvent, clinical studies of, 950
Disc method for determining bacterial sensitivity to aureomycin, inaccuracies in, discovered by comparison with the tube-dilution method, 149
Disseminated lupus erythematosus, effects of nitrogen mustards and triethylene melamine in, 934
Dye sensitivity of smooth Brucellae, 200

E

Ectopic bone marrow, protective effect of shielded, against total body x radiation, 355
Electrocardiogram, transmission of, over standard telephone lines, 792
Electrocardiographic exercise tolerance tests in old myocardial infarction, 809
Electrolyte, dynamic sequestration of an, influence of, on calculation of "space" and "mass" by the tracer method, 786
Emulsifying agents, influence of some, on the digestive tract, 948
Endocarditis, subacute bacterial, cold precipitable serum globulins in, 489
Endothelial permeability to radioactive iodine-tagged albumin injected intravenously or intraperitoneally in man, studies on, 941
Eosinophil cell counts, absolute, logarithmic analysis of, statistical study in healthy young adults, 161
Epinephrine eosinopenia in surgically induced Addison's disease, 169
Erythroblastosis fetalis, problems in management of, with five examples exhibiting unusual serological findings, 27

Erythrocyte counts, low, in pernicious anemia, role of maturation arrest in, 790
ultrastructure membrane of the, fold formation of, 951
Erythrocytes, counting, a diluting fluid for, which simultaneously stains the cells and makes them lie flat within a single focal plane, 479
mechanical fragility of, from leukemic patients, 939
sheep, cold agglutination of, as factor in false positive heterophile agglutination tests, 964
Erythromycin, serum levels after oral administration, 944
Esterification of serum cholesterol. I. Serial determinations in health, 321
II. Influence of phosphatide and other factors, 324
III. In hypercholesterolemic rabbits, 334
Ethylene oxide, sterilization of penicillin and streptomycin by, 67
Experimental metabolic alkalosis, cerebrospinal fluid pressure, pH, and respiration during, 938
porphyria, catalase metabolism in, disturbance of, 939

F

Fat emulsions, intravenously administered, effect of heparin on fate of, 805
Fecal bacteria, conversion of N^{15}-labeled mesobilirubinogen to stercobilinogen by, 921
Femoral arteriovenous sugar differences in fasting human beings, 337
Fetal hemoglobin, immunologic studies of, 787
Fistula between pulmonary artery and left auricle, acute cardiovascular dynamics of, 136
Fluid exchange during incipient nephrogenic hypertension in dogs, 946
Fluids, body, of low density, micromethod for determination of density of, 141
Fluoride, determination of, in drinking water and biological materials, 601
Folic acid compounds, metabolism of, relation of ascorbic acid deficiency to, 924
Free glutamic acid in urine, estimation of, 624
Freezing point of small quantities of biological fluids, method for determination of, 907
Fructose, utilization of, by human subjects and animals, 39

G

Gantrisin, treatment of meningococcic meningitis with, compared with treatment with large doses of penicillin, 891
Gastric juice, potassium, sodium, and calcium content of, 707
Gastrointestinal malignancy, new cytodiagnostic methods in, 935
Genus Brucella, speciation within the. I. Dye sensitivity of smooth Brucellae, 200
Globin, modified. III. Determination of modified human globin in blood serum and in urine, 206
IV. Some of the physiological properties of modified human globin, 211
Globulins, cold precipitable, in subacute bacterial endocarditis, 489
Glomerular filtration rate in treatment of shock, clinical results and effect of norepinephrine on, 925
Glucose and fructose metabolism, effect of stress on, 794
Gout, chronic, severe febrile reaction to Benemid occurring in patient with, 820

H

Hamster as a vehicle for demonstration of pathogenicity of Actinomyces bovis, 914
Heart disease, congenital, quantitation of venous-arterial shunts in, on the basis of dye-dilution curves, 953
failure, congestive, cellular and extracellular factors in, 814
radiocardiogram in, evaluation of, 943
sounds and murmurs, vibration analysis of, 934
Hematologic classification of leukemia cases, 778
Hemochromatosis, secondary, 781
Hemodialysis, clinical, current procedures in, 436
Hemodynamic changes in human beings following induction of high spinal anesthesia, studies of, 819
Hemoglobin, fetal, immunologic studies of, 787
Hemoglobinuric nephrosis in rabbits, influence of in vitro hemoglobin modification on, 102
Hemolytic anemia, acquired, and viremia, 924
Hemophilia-like disease following pregnancy with transplacental transfer of an acquired circulating anticoagulant, 800
Hemorrhage, plasma antithrombin in, 367
Heparin, effect of, on fate of intravenously administered fat emulsions, 805
in acute phase reactions, 806
tolerance with other laboratory tests as indicators of clinical activity, 806
Hepatic cirrhosis, decompensated, use of an anion-cation exchange resin and a liberal diet in, 777
Histoplasma capsulatum, laboratory infections with, frequency of; their clinical and x-ray characteristics, 182
Histoplasmin skin sensitivity to, 813

Histoplasmosis, complement fixation reaction in, study of, 90
Hormone, chorionic gonadotrophin, increase in biological activity of, when mixed with plasma, 923
circulating thyroid, nature of, in euthyroid and hyperthyroid subjects, study of, by use of paper electrophoresis, 791
pituitary growth, effect of, on acetoacetate synthesis of liver, 921
Raben-Westermeyer growth, metabolic evaluation of, in a pituitary dwarf with coexisting diabetes mellitus, 788
Humidity, influence of relative, on survival of infectious agents deposited upon surfaces, 822
Hydrocortisone, hydrocortisone acetate, and cortisone acetate, comparative effects of, in rheumatoid arthritis, 959
Hyperosmolarity of body fluids, chronic, 796
Hypertension, control of, by Hyphex, 941
incipient nephrogenic, in dogs, fluid exchange during, 946
Hypertensive disease, treatment of, evaluation of 1-hydrazinophthalazine as the sole antipressor in, 954
Hyphex in control of hypertension, 941
Hypothyroidism, thyrotropin in diagnosis of obscure, value of, 823

I

Idiopathic thrombocytopenic purpura, bone marrow in, 503
effect of the "thrombocytopenic factor" of, on platelet levels as measured by direct and indirect methods, 498
Illness, study of, in a group of families, 816
Immunologic studies of fetal hemoglobin, 787
India ink, removal of, by the reticuloendothelial system, effects of cortisone on, 801
Infections, laboratory, with Histoplasma capsulatum, frequency of; their clinical and x-ray characteristics, 182
streptococcal, relationship of antigenic characteristics of streptococci and specific antibody responses following, 929
Infectious disease, bone marrow studies in, 920
mononucleosis, serologic tests for syphilis in, 965
Influenza virus, types of, antibody titer of serum pools as index of presence of, in a metropolitan area, 785
Instruments, recording, direct-writing, for use in surgery, in studies of pulmonary function, and in teaching respiratory physiology, conversion of Millikan and Wood type oximeters into, 457
Intra-articular compound F, changes in joint temperature and potential induced by, 948
Intracranial aneurysms, carotid pressure studies in relation to management of, 783
Intraesophageal pressure, measurement of, and its relation to intrathoracic pressure, 664
I^{131} uptake by the thyroid, serial observation of, following thyrotropin, corticotropin, and cortisone, 946
I^{131}-labeled thyroxine in myxedema, euthyroidism, and artificial hyperthyroidism, disposal of, 815
Iodine, radioactive, diagnostic use of, 776
Ionizing radiation, effect of cysteine on immune response and mortality rate of rabbits exposed to, 789
Iron, metabolism of. II. Intravenous iron tolerance tests in Laennec's cirrhosis, 541
Irradiation, therapeutic, some effects of, on standard tests of liver function, 945
total body, of mice, impairment of antimicrobial defenses following, 682
Isonicotinic acid hydrazide and related compounds, action of, on enzymes of brain and other tissues, 965
(isoniazid), treatment of tuberculous meningitis with, 821

K

Kidney, artificial, use of an. III. Current procedures in clinical hemodialysis, 436
circulation, effects of hexamethonium (C-6) and 1-hydrazinophthalazine (HP) on, 818
Na^{22} in rat, radioautographic localization of, 815
Kline test for syphilis, cardiolipin antigen in. IV. Effect of rate of rotation of antigen-serum mixture, 146

L

Laboratory infections with Histoplasma capsulatum, frequency of; their clinical and x-ray characteristics, 182
methods, 141, 297, 479, 601, 755, 901
scintillation counting, practical aspects of, 641
tests, heparin tolerance with other, as indicators of clinical activity, 806
Laennec's cirrhosis, intravenous iron tolerance tests in, 541
observations on, 744
Lanatoside C, increase in oxygen consumption of human cardiac muscle incubated with, 867

Leukemia, age, sex, race, and hematologic classification of 916 cases of, 778
chronic lymphatic, and polycythemia (primary?), morphologic and metabolic studies in a case of coexistent, 779
erythrocytes in, mechanical fragility of, 939
nucleotidase activity of leukocytes in, variations in, 515
Leukocytes, beta glucuronidase content of human, in health and disease, 825
nucleotidase activity of, variations in, in leukemia, 515
Lipase in human blood plasma, 860
Lipids, liver, chemical estimation of, value of needle biopsy in, 780
Liver, acetoacetate synthesis of, effect of pituitary growth hormone on, 921
cirrhosis of, portal circulation time in, following portacaval anastomosis, 537
"compensated" cirrhosis of, excretion of water and sodium in, abnormalities in, 523
disease, plasma antithrombin in, 367
function and structure in neoplastic disease, effect of nitrogen mustard on, 387
bromsulfalein clearance, a quantitative clinical test of, 531
effects of therapeutic irradiation on standard tests of, 945
in untreated Addisonian pernicious anemia, 718
lipids, chemical estimation of, needle biopsy in, value of, 780
vitamin A concentration in, in nephrotic syndrome, 12
Logarithmic analysis of absolute eosinophil cell counts, statistical study in healthy young adults, 161
Lung, biopsy, and cardiac catheterization studies in patients treated surgically for mitral stenosis, 795
in diffuse pulmonary lesions, 957
elastic properties of, in normal men and in patients with chronic pulmonary emphysema, 674
in pulmonary emphysema, elastic properties of, 800
Lymphoma, renal calculi a complication of, 960
Lysozyme, bronchial, 920

M

Marrow regeneration following irradiation, adverse effect of cortisone on, 174
Maturation arrest, role of, in low erythrocyte counts of pernicious anemia, 790
Membrane produced in man by application of vesicant cantharides, transfer of sodium and chloride across, 818
Meningitis following procedures on central nervous system, clinical study of, 779
Meningococcic meningitis, treatment with large doses of penicillin compared to treatment with Gantrisin, 891
Mental symptoms from myxedema, 267
Mercurial diuretic, a new oral, experiences with, 803
Metabolic processes, effect of certain, on clotting mechanism, 111
Metabolism, glucose and fructose, effect of stress on, 794
of compound F, studies on, 797
of folic acid compounds, relation of ascorbic acid deficiency to, 924
of iron. II. Intravenous iron tolerance tests in Laennec's cirrhosis, 541
Methyl alcohol poisoning, pancreatitis in, 405
Micromethod for determination of density of body fluids of low density, 141
for serum bilirubin, 610
Millikan and Wood type oximeters, conversion of, into direct-writing recording instruments for use in surgery, in studies of pulmonary function, and in teaching respiratory physiology, 457
Mitral stenosis, cardiopulmonary studies in patients with. I. Cardiovascular dynamics, 390
oxygen diffusion capacity of alveolar-capillary membrane in, 782
patients treated surgically for, biopsy of lung and cardiac catheterization studies in, 795
valve surgery, results of, physiological evaluation of, 808
valvuloplasty, trends in, 776
Modified globin. III. Determination of modified human globin in blood serum and in urine, 206
IV. Some of the physiological properties of modified human globin, 211
Monkey chair, a neurosurgical and multiple purpose, 484
Monodisperse radioactive gold colloids, preparation and particle size measurement of, 261
Multiple myeloma, renal function in, 519
Mumps, aureomycin, chloramphenicol, and terramycin in, therapeutic trial of, 951
Myasthenia gravis, sensitivity of patients with, to tubocurarine and decamethonium, 927
therapeutic effects of alkyl phosphates in, comparison of, 805
Mycobacterium tuberculosis, blood media for cultivation of. IV. Effect of adding penicillin, 628
Myocardial infarction, acute, circulatory changes in, 802
electrocardiographic exercise tolerance tests in old, 809
Myeloma, multiple, renal function in, 519
Myxedema, euthyroidism, and artificial hyperthyroidism, disposal of I^{131}-labeled thyroxine in, 815
mental symptoms from, 267

N

NA^{22}, radioautographic localization of, in rat kidney, 815
Needle biopsy in chemical estimation of liver lipids in man, value of, 780
Neoplastic disease, liver function and structure in, effect of nitrogen mustard on, 387
Nephrosis, hemoglobinuric, in rabbits, influence of in vitro hemoglobin modification on, 102
Nephrotic syndrome, vitamin A concentration in liver in, 12
Nervous system, central, meningitis following procedures on, clinical study of, 779
Neurosurgical and multiple purpose monkey chair, 484
Newcastle disease virus in man, 736
Nitrogen mustard, effect of, on liver function and structure in patients with neoplastic disease, 387
mustards and triethylene melamine, effects of, in disseminated lupus erythematosus, 934
Nitrous oxide, diffusion of, into cerebrospinal fluid, differential rates of, 851
Norepinephrine, clinical results and effect on glomerular filtration rate in treatment of shock, 925
Nucleotidase activity of leukocytes, variations in, in leukemia, 515

O

Obesity and impaired carbohydrate metabolism in the "prediabetic" mothers of large infants, 801
Organism *t* antigen, study of, in routine complement fixation test for amebiasis, 78
Oximeter, whole blood, use of, during cardiac catheterization, 445
Oximeters, Millikan and Wood type, conversion of, into direct-writing recording instruments for use in surgery, in studies of pulmonary function, and in teaching respiratory physiology, 457
Oxygen consumption, increase in, of human cardiac muscle incubated with lanatoside C, 867
content and oxyhemoglobin saturation of blood, spectrophotometric determination of, 431
Oxypolygelatin and dextran as plasma volume expanders: renal excretion and effects on renal function, 880

P

Pancreatitis in methyl alcohol poisoning, 405
Paper chromatography of the "pregnanediol" fraction of urine, 780
Paper—Cont'd
electrophoresis in study of nature of circulating thyroid hormone in euthyroid and hyperthyroid subjects, 791
Para-aminosalicylic acid and Promizole, simultaneous determination of, 649
Parabiotic rats, radiation reactions in, 342
Parasitologic diagnosis, polyvinyl alcohol in, additional uses for, 154
Paroxysmal ventricular tachycardia treated with intravenous quinidine, 814
Particle size, effect of, on blood clearance and tissue distribution of radioactive gold colloids, 255
Patent ductus arteriosus, partially irreversible left ventricular enlargement associated with, 935
Penicillin and streptomycin, sterilization of, by ethylene oxide, 67
lack of influence of, on coagulation of blood, 956
severe proteus bacteremia treated successfully with large doses of, 957
treatment of meningococcic meningitis with large doses of, compared to treatment with Gantrisin, 891
Pentamidine, in vitro fungistatic activity of, 782
Pernicious anemia, Addisonian, liver function in untreated, 718
low erythrocyte counts of, role of maturation arrest in, 790
urorennin excretion in, 926
Petroleum, sensitivity to, 931
Phenylindandione, a new oral anticoagulant, 792
Pheochromocytoma, blood pressure in, operative and postoperative control of, 810
Pipette for preparing serial dilutions, an automatic, 654
Pituitary growth hormone, effect of, on acetoacetate synthesis of liver, 921
Plasma antithrombin in thrombosis, hemorrhage, and liver disease, 367
carbon dioxide, determination of, use of volumetric respirometer in, 156
citrated human, use of, for studying bacterial resistance to streptomycin, 784
glutamic acid, observations on, 703
lipase in human, 860
pepsinogen. I. The source, properties, and assay of the proteolytic activity of plasma at acid reactions, 17
II. The activity of the plasma from "normal" subjects, patients with duodenal ulcer, and patients with pernicious anemia, 188
transfusion reaction, pathogenesis of, with especial reference to the blood coagulation system, 374
volume expanders, dextran and oxypolygelatin as; renal excretion and effects on renal function, 880

Pneumococcic infection in mice, effectiveness of treatment of, with a combination of multiple doses of aureomycin and penicillin administered over a three-day period, 820
Poliomyelitis, articular cartilages of, histochemical characterization of, 284
Polybrene, antiheparin effect of, 927
Polycythemia (primary?), and chronic lymphatic leukemia, morphologic and metabolic studies in a case of coexistent, 779
vera, total thyroidectomy in, follow-up study on clinical and hematologic results of, 919
Polymyxin B, toxicity of, animal and human studies on, with particular reference to an evaluation of renal function, 963
Polyvinyl alcohol in parasitologic diagnosis, additional uses for, 154
Polyvinylpyrrolidone concentrations in body fluids, measurement of, by means of a turbidity-producing reaction with phenol, 616
Porphyria, experimental, catalase metabolism in, disturbance of, 939
Portacaval anastomosis, portal circulation time in cirrhosis of liver following, 537
Postural effects in tetralogy of Fallot, 922
Potassium, sodium, and calcium content of gastric juice, 707
Pregnancy, vitamin B_6 metabolism in, disturbance of, 550
"Pregnanediol" fraction of urine, paper chromatography of, 780
Pressure, intraesophageal, measurement of, and its relationship to intrathoracic pressure, 664
Probenecid (Benemid), metabolic and renal effects of, 798
severe febrile reaction to, occurring in patient with chronic gout, 820
Promizole and para-aminosalicylic acid, simultaneous determination of, 649
Propamidine, in vitro fungistatic activity of, 782
Proteus bacteremia, severe, treated successfully with large doses of penicillin, 957
Prothrombin of baby at birth, 929
Pulmonary emphysema, chronic, elastic properties of lung in normal men and in patients with, 674
elastic properties of lung in, 800
lesions, lung biopsy in diffuse, 957
Pulse curves in diagnosis of congenital subaortic stenosis and aortic stenosis, 785
Pyridoxine, seborrheic dermatitis, a local metabolic defect involving, 121

Q

Quinidine, intravenous, paroxysmal ventricular tachycardia treated with, 814

R

Raben-Westermeyer growth hormone, metabolic evaluation of, in a pituitary dwarf with coexisting diabetes mellitus, 788
Radiation reactions in parabiotic rats, 342
Radioactive gold colloids, blood clearance and tissue distribution of, effect of particle size on, 255
monodisperse, preparation and particle size measurement of, 261
iodinated human serum albumin, absorption and urinary excretion of orally administered, in human beings, 823
iodine, diagnostic use of, 776
iodine-tagged albumin, endothelial permeability to, injected intravenously or intraperitoneally in man, studies on, 941
Radiocardiogram in heart failure, evaluation of, 943
Radium deposited in skeleton of human beings, delayed toxicity of, 807
Recording instruments, direct-writing, for use in surgery, in studies of pulmonary function, and in teaching respiratory physiology, conversion of Millikan and Wood type oximeters into, 457
Renal calculi, a complication of lymphoma, 960
function, effects of dextran and oxypolygelatin as plasma volume expanders on, 880
in multiple myeloma, 519
toxicity of Polymyxin B with particular reference to; animal and human studies on, 963
hemodynamics and water and electrolyte excretion in patients with hypertension and renal damage, effect of a head-up tilted position on, 798
Replacement therapy in Addison's disease, metabolic effects of, 787
Respirometer, volumetric, use of, in determination of plasma carbon dioxide, 156
Rheumatic fever, acute course of, comparative effects of ACTH, cortisone, and aspirin on, 812
antibody production and tuberculin sensitivity in, 930
Rheumatoid arthritis, comparative effects of hydrocortisone, hydrocortisone acetate, and cortisone acetate in, 959
treated with cortisone, electrophoretic studies on, 10

S

Salmonella, cultures of, isolated in city of Mexico, classification and distribution of 1,075, 73

Sarcoidosis, biliary cirrhosis with cutaneous xanthomatosis due to; treatment with low cholesterol diet, ACTH, and cortisone, 799
Scintillation counting, laboratory, practical aspects of, 641
Seborrheic dermatitis; a local metabolic defect involving pyridoxine, 121
Secondary hemochromatosis, 781
Sensitivity, bacterial, to aureomycin and chloramphenicol, changes in, in course of past three years, 48
disc method for determining, inaccuracies in, discovered by comparison with the tube-dilution method, 149
dye, of smooth Brucellae, 200
to petroleum, including its derivatives and antecedents, 931
Serial dilutions, automatic pipette for preparing, 654
Serum acetycholinesterase, 692
albumin, iodinated (I^{131}) human, disappearance from circulating blood, continuous recording determination of, 928
human, absorption and urinary excretion of orally administered, in human beings, 823
anti-sickle-cell anemia rabbit, in diagnosis of sickle-cell anemia, 940
bilirubin, micromethod for, 610
cholesterol, esterification of. I. Serial determinations in health, 321
II. Influence of phosphatide and other factors, 324
III. In hypercholesterolemic rabbits, 334
serial, in children with diabetes mellitus of recent onset, 793
levels after oral administration and treatment of erythromycin, 944
mucoproteins and gamma globulin, effect of anti-tuberculous therapy on, 937
profibrinolysin and antitrypsin titers in vitro lysis of whole blood clots of irradiated rabbits, 791
Shock, norepinephrine in treatment of, clinical results and effect on glomerular filtration rate in, 925
Shwartzman reaction, generalized, cardiac lesion of, in rabbits infected by group A streptococci, 955
reactions, local and generalized, inhibition of, by heparin, 804
Sickle-cell anemia, diagnosis of, anti-sickle-cell anemia rabbit serum in, 940
Skin sensitivity to histoplasmin, 813
Smoking, effect of, on circulation and skin temperatures of normal men, 943
Sodium and chloride, transfer of, across a membrane produced in man by application of vesicant cantharides, 818
Somatic antigen common to Salmonella adelaide, Escherichia coli-gomez, and Escherichia coli O111:B4, a complete, 252
"Space" and "mass," calculation of, by tracer method, influence of dynamic sequestration of an electrolyte on, 786
Span 60 and Tween 60, feeding of large amounts of, to human beings, effect of prolonged, 958
Spectrophotometric determination of oxyhemoglobin saturation and oxygen content of blood, 431
method for determination of carbon monoxide in blood, a new, 634
Spinal anesthesia, high, hemodynamic changes in human beings following induction of, 819
Stenosis, congenital subaortic and aortic, pulse curves in diagnosis of, 785
Stereovectorcardiograph, 726
Sterilization of penicillin and streptomycin by ethylene oxide, 67
Steroid compounds resulting from incubation of cortisone with surviving liver slices, 796
Stilbamidine, in vitro fungistatic activity of, 782
Streptococci, beta-hemolytic, comparative effectiveness of direct blood agar and modified Pike's broth for demonstrating, of different serological groups, 297
group A, rabbits infected by, reaction in cardiac lesion of, generalized Shwartzman reaction in, 955
Streptococcal infections, relationship of antigenic characteristics of streptococci and specific antibody responses following, 929
Streptomycin and penicillin, sterilization of, by ethylene oxide, 67
bacterial resistance to, use of citrated human plasma for studying, 784
Stress, effect of, on glucose and fructose metabolism, 794
Sugar differences, femoral arteriovenous, in fasting human beings, 337
Sulfonamide plasma levels, effects of Benemid on free and total, 730
Sympathectomy, supersensitivity of blood vessels of human skeletal muscle to adrenaline following, 794
Syphilis in infectious mononucleosis, serologic tests for, 965
Kline test for, cardiolipin antigen in. IV. The effect of rate of rotation of antigen-serum mixture, 146

T

Tetanus antitoxin titrations, avidity of test toxins in relationship to, 58
Tetralogy of Fallot, postural effects in, 922
Thoracic surgery, alveolar ventilation during, 947
Thrombin assay, new method for; its application to study of thrombin function, 803

"Thrombocytopenic factor" of idiopathic thrombocytopenic purpura, effect of, on platelet levels as measured by direct and indirect methods, 498
Thrombocytopenic states, ACTH and cortisone in, responses to, 810
Thrombosis, plasma antithrombin in, 367
Thyroid, I^{131} uptake by, serial observation of, following thyrotropin, corticotropin, and cortisone, 946
Thyroidectomy, total, in polycythemia vera, follow-up study on clinical and hematologic results of, 919
Thyrotropin, value of, in diagnosis of obscure hypothyroidism, 823
Toxins, test, avidity of, in relationship to tetanus antitoxin titrations, 58
Transfer rates, effects of dialyzer construction on, 271
Trypsin, action of intravenously administered studies on, 942
Tuberculin sensitivity in rheumatic fever, 930
Tuberculosis, Mycobacterium, blood media for the cultivation of. IV. Effect of adding penicillin, 628
Tuberculous meningitis, treatment of, with isonicotinic acid hydrazide (isoniazid), 821
Tube-feeding rats, apparatus for, 486
Tubocurarine and decamenthonium, sensitivity to, of patients with myasthenia gravis, 927
Tween 60 and Span 60, feeding of large amounts of, to human beings, effect of prolonged, 958

U

Ultrasonic visualization of soft tissue structures and disease processes, 812
of the body, 579
Urine, dextran in blood and, quantitative determination of, a simple, accurate, and rapid method for, 901
free glutamic acid in, estimation of, 624
modified human globin in, determination of, 206
"pregnanediol" fraction of, paper chromatography of, 780
Uropepsin excretion in man, technical and clinical factors influencing the determination of, 872
Urorennin excretion in pernicious anemia, 926

V

Vascular bed in limb of dog, mechanism of action of desoxyephedrine on, 131
collapse due to gram-negative bacteria, syndrome of, management with l-norepinephrine and antibiotics, 961
Venous-arterial shunts in congenital heart disease, quantitation of, on the basis of dye-dilution curves, 953
Ventricular enlargement, partially irreversible left, associated with patent ductus arteriosus, 935
tachycardia, paroxysmal, treated with intravenous quinidine, 814
Viremia, acquired hemolytic anemia and, 924
Virus, Newcastle disease, in man, 736
Visualization, ultrasonic, of soft tissue structures of the body, 579
and disease processes, 812
Vitamin A concentration in liver in nephrotic syndrome, 12
B_6 metabolism in pregnancy, disturbance of, 550
Volumetric respirometer, use of, in determination of plasma carbon dioxide, 156

W

Water, drinking, determination of fluoride in, 601
Whole blood oximeter, use of, during cardiac catheterization, 445

X

X-radiation, total body, protective effect of shielded ectopic bone marrow against, 355
